## Bit of Advice to Women.

Don't pick out a man for a husband simply because you love him. The most important thing is whether he loves you. A woman who loves her husband better than he does her is a doormat on which he treads. If he loves her better than she does him, he looks up to her as a goddess and spends his life trying to win her favor.

A too adoring wife bores a man with her affection, but no woman ever had and the more affection the man lavishes upon her the stronger the claim enough love given her to satisfy her, he establishes. After marriage a thousand things draw a woman's heart to her husband; a thousand things estrange him from her.—Woman's World.

## Why Japs Admire the Carp.

The carp, which plays so prominent a part in Japanese decorations, is also the principal dish at a high-class Japanese dinner. It is deemed to be the dish above all others upon which young men who desire a martial career should be fed, as its eaters are supposed to imbibe the courage of the fish.

It is the bravest of all the Japanese fish, and the only one that can swim up a waterfall. Yet when finally caught it will lie perfectly still while waiting to be killed. These qualities of bravery, strength and resignation are much desired by Japanese young men, and happy is the family on whose table the carp appears at frequent intervals.

## Green Primroses.

The green rose is a very old and rather ugly "novelty" that crops up afresh from time to time as a catch-penny attraction, and there are one or two other plants with green flowers that are usually more curious than attractive. The latest invention in the way of green-flowering varieties in an addition to that familiar family, our own yellow primrose. It is called "novelty" and is described as a large and truly green-flowered form of the beautiful old wild primrose, a free bloomer and strong grower.

## Considerate Papa.

# THE AMERICAN MONTHLY REVIEW OF REVIEWS

## THE NECESSARY MAGAZINE IN THE PRESIDENTIAL YEAR.

The Review of Reviews is often called a necessity, in recognition of its usefulness in keeping readers "up with the times."

In Presidential election years the REVIEW OF REVIEWS is more than ever "the necessary magazine." Everybody wants to be truly and quickly informed about this or that public question that has forged to the front; to know about the new candidates and personal factors in politics, to have a complete picture at hand of the current movement of history.

In Dr. Shaw's editorials, in its authentic and timely contributed articles, in its brilliant character sketches, in its cordentations and reviews of all the important articles of other magazines, and in its hundred a month of valuable portraits, witty cartoons, and interesting views, the REVIEW OF REVIEWS gives the much desired news of the world's and our own progress. "The World under a Field-glass" is the way one subscriber describes it. Men in public life, like President Theodore Roosevelt, the members of Congress, and the great captains of industry, who must keep "up with the times," intelligent men and women all over America, have decided it is "indispensable."
